REMIX IDE

| TEAM ID	NM2023TMID04404
PROJECT NAME	ELECTRONIC VOTING SYSTEM

Duration:

2 Hrs

Skill Tags:

Remix IDE is a no-setup tool with a GUI for developing smart contracts. Used by experts and beginners alike, Remix will get you going in double time. Remix plays well with other tools, and allows for a simple deployment process to the chain of your choice. Remix is famous for its visual debugger.
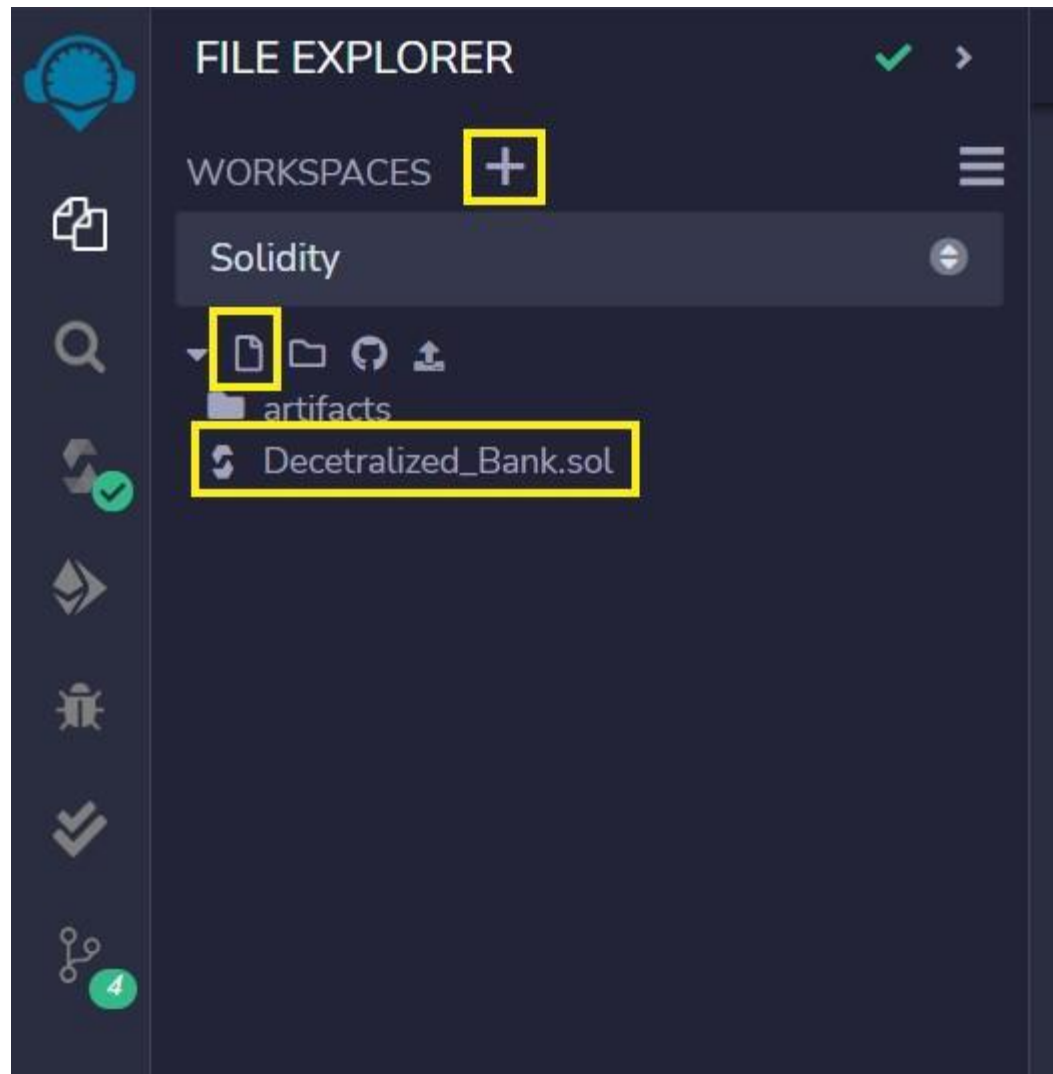

STEP 1:

Open Remix IDE

Click on File Explorers and Create a new WORKSPACE (by Clicking on the + icon).

STEP2:

Click on file explorers and solidity in the environment and create a new file filename.sol by Clicking on new file section.

STEP 3:

Add the solidity code in the Filename.sol file.

STEP 4:

Create a file in contract folder and paste the smart contract code in the file.
